

What I already know...

The Earth is a planet in a space and we live on it.

There are stars in the night sky.

Key Knowledge

- Planets are in the shape of a ball.
- The earth is tilted on an imaginary line called an Axis.
- The Sun is in the middle of the planets.
- Planets move around the Sun which is called an orbit.
- Day is happens because the Earth faces the Sun.
- Night is dark because Earth faces away from the Sun.
- Different countries around the world have different times for day and night.
