

There are 8 planets in our solar system

All the planets move around the sun.

The side closest to the sun is in daytime.

The side furthest away from the sun is in night time.

The Earth spins around.

Helen Sharman

Helen grew up in Sheffield and studied Chemistry. In 18th May 1991, she became the **first British astronaut to ever go into space**. Having previously worked in the Mars factory, studying the chemistry of ice cream this was quite a change to her career!
